Ngo Quang Phuc

Frontend Developer

0962447792 ngophuc2911@gmail.com https://portfoliocuaphuc.netlify.app/ Đồng Nai / TPHCM

CAREER OBJECTIVE

Frontend Developer with hands-on experience in React.js and Next.js, focused on building responsive, scalable, and user-centric web applications. Strong in developing reusable UI components, state management, and API integration. Experienced in debugging, optimizing user experience, and delivering features in Agile environments. Proactive learner with an interest in AI-assisted development workflows.

WORK EXPERIENCE

Digitech Solutions 6/2025 - 12/2025

Position : Intern Frontend Developer

Experience Description :

- Contributed to end-to-end frontend development, from building new features from scratch to refining existing modules based on changing requirements
- Developed responsive and scalable UI with React.js and Next.js, focusing on maintainability and reusability
- Fixed bugs, handled task adjustments, and delivered features under deadline pressure while maintaining code quality
- Integrated RESTful APIs and improved client-side data flow for smoother user experience
- Collaborated in an Agile team environment, participating in code reviews and iterative development
- Ensured consistent UI/UX quality by aligning implementation with design requirements and product feedback

SKILL

Frontend	React.js, Next.js , React Native
State Management	React Query, Redux Toolkit, Zustand
UI / Styling	Tailwind CSS, Shadcn UI, Ant Design
Backend (Support)	Node.js, Express.js, MongoDB, SQL
Others	REST APIs, Socket.IO, Git/GitHub, Postman, Agile/Scrum
AI Tools:	Cursor,Claude,Gemini,ChatGPT, GitHub Copilot

PROJECTS

Real-time Chat Application 04/2026 - 06/2026

Role: Frontend Developer

Technologies: ReactJS, TypeScript, Socket.IO (client), Zustand, React Hook Form, Zod, TailwindCSS, Shadcn UI
Description: Developed a real-time chat application inspired by modern messaging platforms, focusing on responsive UI, smooth user experience, and real-time interaction.
Key Contributions:

- Designed and developed responsive and user-friendly chat interfaces using React.js and Tailwind CSS
- Managed client-side state efficiently with Zustand for conversations, messages, and UI states
- Integrated real-time communication using Socket.IO client (instant messaging, typing indicators, online status)
- Integrated frontend with RESTful APIs for real-time data handling and conversation flows
- Implemented form handling and validation using React Hook Form and Zod
- Optimized user experience with features like infinite scrolling for message loading
- Focused on performance and smooth UI updates for real-time interactions

Learning Outcomes: Strengthened frontend development skills in building real-time applications, state management, API integration, and optimizing user experience for interactive systems.

MegaTrip – Travel Booking Platform 9-2025 - 12-2025

Role : Frontend Developer

Technologies: Next.js, TypeScript, Tailwind CSS, Shadcn UI, React Query, React Hook Form
Description: Developed a scalable travel booking platform with a focus on building responsive, SEO-friendly interfaces and seamless booking experiences for end users, along with an admin dashboard for system management.
Key Contributions:

- Built responsive and SEO-optimized pages using Next.js App Router, reusable components, and Tailwind CSS
- Designed and implemented booking flows with form validation, error handling, and smooth user interactions
- Managed server state and API communication efficiently using React Query and Axios interceptors
- Integrated frontend with backend APIs for booking flows and data handling
- Developed admin dashboard UI with data management features for services, orders, users, and content
- Improved user experience through structured data flow and optimized UI rendering
- Integrated AI chatbot into the interface to support customer interactions and enhance usability

Learning Outcomes: Strengthened expertise in building scalable frontend architectures, handling complex UI flows, managing server state, and optimizing user experience in production-style applications.
