# Ngo Quang Phuc

FullStack Developer

0962447792 ngophuc2911@gmail.com https://portfoliocuaphuc.netlify.app/ District 12, Ho Chi Minh City

## EDUCATION

**Industrial University of Ho Chi Minh City** 2021 - 2026

Information Technology

GPA: 3.2 / 4.0

## SKILL

| | |
|---|---|
| **Frontend** | HTML, CSS, JavaScript (ES6+),React.js, Next.js , React Native |
| **State Management** | React Query, Redux Toolkit, Zustand |
| **UI / Styling** | Tailwind CSS, Shadcn UI, Ant Design |
| **Backend** | Node.js, Express.js, MongoDB, SQL (MySQL) |
| **Others** | REST APIs, Socket.IO, Git/GitHub, Postman, Agile/Scrum |
| **AI Tools:** | Cursor,Claude,Gemini,ChatGPT, GitHub Copilot |

## WORK EXPERIENCE

**Digitech Solutions** 6/2025 - 10/2025

**Position : Intern Frontend Developer**

**Experience Description :**

- Contributed to end-to-end frontend development, from building new features from scratch to refining existing modules based on changing requirements
- Developed responsive and scalable UI with React.js and Next.js, focusing on maintainability and reusability
- Fixed bugs, handled task adjustments, and delivered features under deadline pressure while maintaining code quality
- Integrated RESTful APIs and improved client-side data flow for smoother user experience
- Collaborated in an Agile team environment, participating in code reviews and iterative development
- Ensured consistent UI/UX quality by aligning implementation with design requirements and product feedback

## PROJECTS

**Real-time Chat Application** 03/2026 - 05/2026

**Technologies : ReactJS, TypeScript, Node.js, Express, Socket.IO, MongoDB, Zustand, React Hook Form, Zod, TailwindCSS, Shadcn UI**

**Description** : Developed a full-stack real-time chat application inspired by modern messaging platforms, supporting instant messaging, media sharing, and responsive user experience.

**Contributions**:

- Designed and developed the entire application (frontend, backend, and real-time communication) independently
- Built responsive UI using React + TailwindCSS and managed state with Zustand
- Developed RESTful APIs with Node.js + Express for authentication, conversations, and messaging
- Implemented real-time features using Socket.IO (message delivery, typing indicators, online status)
- Applied JWT authentication and form validation with Zod + React Hook Form
- Optimized performance with infinite scrolling for message loading

**MegaTrip – Travel Booking Platform** 9-2025 - 12-2025

**Technologies: Next.js ,TypeScript, Tailwind CSS, Shadcn UI, React Query, React Hook Form, Node.js, Express**

**Description** : Built an all-in-one travel booking platform for flights, bus trips, and tour packages, with both customer-facing booking flows and an admin management dashboard.

**Key Contributions:**

• Owned end-to-end development across the frontend, backend, and API integration layer
• Built responsive, SEO-friendly pages using Next.js App Router, reusable components, and Tailwind CSS
• Implemented booking workflows with form validation and error handling
• Developed backend APIs with Node.js, Express, MongoDB, and JWT for authentication and core business logic
• Integrated payment gateways and external services including Stripe, VNPAY, and Nodemailer
• Developed the admin dashboard with CRUD features for services, orders, users, and CMS content
• Integrated React Query and Axios interceptors to manage server state and authenticated requests efficiently
• Integrated an AI chatbot to support customer inquiries and improve user experience
