API & Data: RESTful API integration, Axios
Backend (Supporting): Node.js, Express.js
Realtime: Socket.IO
Tools & Workflow: Git/GitHub, GitFlow , Code Review, Figma handoff, Postman
Language: Technical English

WORK EXPERIENCE & PROJECT

Digitech Solutions 6/2025 - 9/2025

Position : Intern Frontend Developer

Experience Description :

- Developed and maintained web interfaces using **React.js and Next.js**
- Built new UI pages based on product requirements and Figma designs
- Converted UI designs into **clean, reusable components**
- Improved **responsive layout** and cross-browser compatibility
- Integrated REST APIs and handled data fetching
- Collaborated with team using **Git/GitFlow**, participated in code reviews
- Worked in **Agile/Scrum environment** with daily standups

Real-time Chat Application 12/2024 - 5/2025

Type: Team Project

Technologies: ReactJS, React Native, Node.js, Express, Socket.IO, MongoDB, Context API
Team Size: 2 members | **Role:** Frontend Developer
Project Description:
A cross-platform real-time chat application inspired by Zalo, featuring core messaging functionalities for both web and mobile platforms.
Contributions:

- Developed responsive UI for chat, conversation, and contact management

- Integrated **Socket.IO for real-time messaging**
- Implemented **Context API for state management**
- Ensured cross-device compatibility (web & mobile)
- Collaborated using Git/GitHub for version control

- **Mobile:** https://github.com/ngophuc29/zalo_mobile.git
- **Backend:** https://github.com/ngophuc29/sockettuBuild.git

---

MegaTrip – Travel Booking Platform 8/2025 - 12/2025

Type: Graduation Project

Role: **Full-stack Developer**

Team size: **2 members**

Technologies: Next.js (App Router), TypeScript, Tailwind CSS, Shadcn UI, Axios, React Hook Form

Description:

An all-in-one travel booking platform supporting Flights, Bus Trips, and Tour Packages, including a customer-facing web application and an admin management dashboard.

Key Contributions:

- Developed SEO-friendly web application using Next.js (SSR, SSG) with App Router
- Built reusable UI component system with TailwindCSS & shadcn/ui
- Converted Figma designs into responsive and accessible UI
- Implemented full booking flows with validation & API integration
- Managed server state using React Query
- Built Admin Dashboard with full CRUD features (users, orders, services)
- Implemented authentication flow using Axios interceptors
- Optimized performance with lazy loading, reducing initial load time
- Integrated AI chatbot to enhance user experience
